

Difficult lubrication

Special Product

The product family TecnoLubeseal® is completed with a new lubricant specifically designed to operate in the most demanding operating conditions environmental.

Telescopic

Are Kinematic mechanisms slow and very loaded that are to operate outdoors in the most demanding environmental conditions.

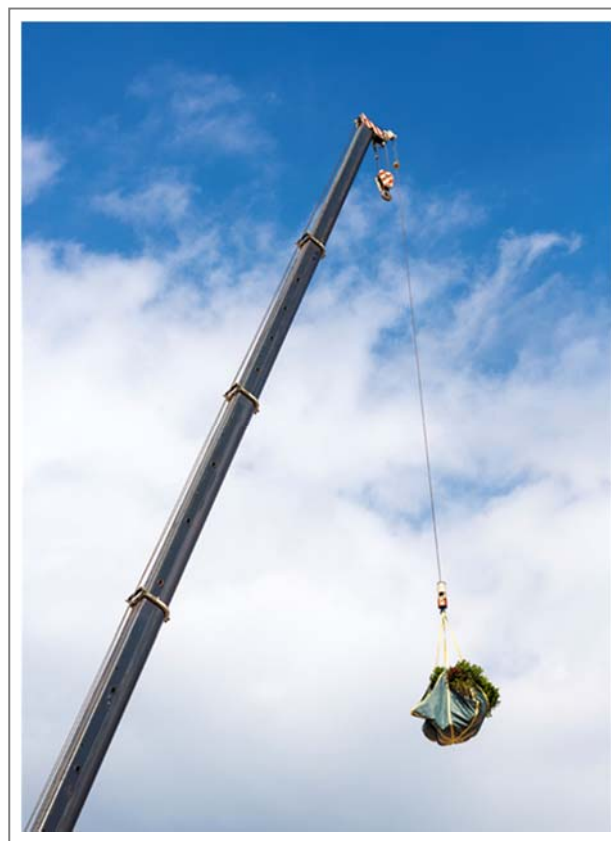

MASTER COMPOUND HP

The right solution for long-term lubrication of telescopic slides. It is a paste of red color, soft and adhesive based on special soaps capable of ensuring top performance.

Reduces Wear

Thanks to the special soaps and the presence of PTFE micro-dispersed.

Spreadable and Adhesive

Thanks to a correct balance between viscosity polymers and base oil in the formulation.

Resistant to Water and Corrosion

Thanks to the synergy between the soaps and anti-rust additives in the formulation.
